PROFESSIONAL SUMMARY

I am a B.E Computer Science and Engineering graduate with hands-on experience in full-stack web development (Django, JavaScript), Python programming, SQL databases, and machine learning / NLP (BERT, Scikit-learn). Looking for an entry-level Software Developer role to design, build, and deploy efficient, scalable, and user-focused applications.

INTERNSHIP

Python Programming Intern — CodSoft Sep 2026 – Oct 2026

- Developed Python applications including To-Do List task manager, Rock-Paper-Scissors game, and Contact Book application.
- Strengthened programming, problem-solving, and application development skills.

Artificial Intelligence Intern — CodeAlpha Aug 2026 – Sep 2026

- Developed two AI-based applications: a Banking FAQ Chatbot using NLP, TF-IDF, Cosine Similarity, and Flask, a Real-Time Object Detection & Tracking System using YOLO, OpenCV, and Deep SORT.
- Gained practical experience in python, Machine Learning, Natural Language Processing, Computer Vision, API development, and real-world AI application development.

Full Stack Development Intern — Nova Spark Hub Jul 2025 – Aug 2025

- Contributed to full-stack web development tasks, gaining hands-on experience with frontend and backend integration.
- Built and tested responsive UI components as part of a collaborative development team.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, JavaScript
- Web Development: HTML5, CSS3, Django, REST APIs
- Machine Learning & NLP: BERT, Scikit-learn, Text Classification, Model Training
- Concepts: Data Structures, Object-Oriented Programming, DBMS
- Tools & Platforms: VS Code, Google Colab, IDLE (Python)

PROJECTS

Employee Onboarding & Document Checklist Automation 2026

- Developed an Employee Onboarding and Document Checklist system using Django, React, and PostgreSQL.
- Built features for employee onboarding, document submission, checklist management, and status tracking.
- Integrated REST APIs between React and Django to streamline and automate employee onboarding process.

ToxiGuard — AI-Based Comment Moderation System 2026

- Built a real-time comment moderation system using React for frontend and Django/Flask for backend.
- Implemented a BERT-based model to classify comments into multiple toxicity categories.
- Designed an admin dashboard for reviewing flagged comments alongside the core moderation interface.
- Applied threshold-based decision logic to automatically allow, flag, or delete toxic comments, reducing manual moderation effort.

CERTIFICATIONS

- Artificial Intelligence Internship Certificate – CodeAlpha
- Software Development Job Simulation – Datacom (Issued by Forage)
- Full Stack Development Internship Certificate – Nova Spark Hub

EDUCATION

Alpha College of Engineering — B.E., Computer Science and Engineering 2022 – 2026 | Chennai
CGPA: 8.0 / 10

LANGUAGES

- Tamil — Native
- English — Professional working proficiency
